

California Regional Water Quality Control Board-Los Angeles Region
Contracts and Grants Program

Project Summary: 04-227-554

Project Number:	04-227-554	Project Status:	Active	Grant Manager:	D Koo
Project Name:	Headwaters to Groundwater: Upper Los Angeles River Area Assessment Project		Project on Schedule:	Yes	

Project Details

Watershed:	Multiple Watersheds	Project Description:	This project provides a water quality and habitat assessment of the headwaters of the Los Angeles River. It will identify undeveloped areas in the western section of the Upper Los Angeles River Area that currently provide quality native water recharge to the San Fernando Valley Groundwater Basin, identify opportunities to increase infiltration of the native water to the groundwater basin, and integrate the science-based data into the existing plans of jurisdictional agencies and local watershed groups. By identifying cost-effective opportunities to infiltrate native water into the groundwater basin, the project will reduce the need to import water from the Bay-Delta to sustain safe yields.
-------------------	---------------------	-----------------------------	--

Problem Statement:	Outcomes:	The goals of this research and outreach project is to 1) identify undeveloped areas in the western section of the Upper LA River Area that currently provide quality native water recharge to the San Fernando Valley Groundwater Basin, a local water source, 2) identify opportunities to increase infiltration of the native water to the groundwater basin, and 3) integrate the science-based data into the existing plans of jurisdictional agencies and local watershed groups.
